## WARNING

You climb at your own risk. Climbing is a dangerous activity carrying the risk of serious injury or death. If you climb, the presumption is that you are aware of and accept these risks together with responsibility for your activities and your safety.

You are the sole judge of conditions, the suitability of any chosen route, the ability of the party and you take sole responsibility for your actions.

Rock is a dynamic medium and rockfalls are frequent. In the mountains the weather changes quickly, climbs change unpredictably; blocks, flakes and holds become loose and fall off, rock becomes vegetated and dirty, in situ gear deteriorates or disappears. Even a minor change can have a dramatic effect on the difficulty or seriousness of a route. There can be no presumption that any given climb will be found in the condition described. It is therefore essential that climbers judge the seriousness or difficulty of any route before committing themselves.

While every effort is made to present accurate information, the descriptions, grades and comments provided in this guidebook are compiled from a number of sources. They may contain errors, are subjective or may have changed and should not be relied on. Neither the FRCC nor anyone involved with the production of this guide can be held responsible for any inaccuracies, omissions or mistakes, nor liable for any personal or third party injuries or damage, howsoever caused, arising from the use of this information.

## The Club

The Fell & Rock Climbing Club is the premier rock climbing and mountaineering club in the English Lake District. We are an active club with a worldwide membership of over 1100 members all of whom found their mountaineering origins in the Lakes.

More about the Fell and Rock Climbing Club

- MEETS - we arrange an extensive meets programme - over 40 meets are held, mainly in the Lakes but more widely in Europe and beyond
- HUTS - the Club owns seven huts and three cottages, principally in the Lakes but also Scotland, well-positioned for access to the mountains
- FRCC GUIDES - the Club has been the authoritative publisher of climbing guidebooks to the Lakes since 1922

# Runestone Quarry

OS Ref: NY30650244

Alt: 250m

Gothic ravines and decaying quarry buildings hide this sheltered fast-drying sport venue that offers enjoyable slabs and steep walls catching the morning or afternoon sun. Runestone is easily-reached and sits hidden in an elevated secluded position, marked by huge spoil heaps, overlooking the Langdale fells.

Ignored for two decades, re-equipping the quarry was started by members of the Eden Valley MC in 2019 and has been continued by a few enthusiastic activists with support from the **Cumbria Bolt Fund**. This hard work, and the publication of this guide, is completed voluntarily and your donations support the purchase of equipment. If you have enjoyed climbing here please make a donation at - [www.cumbriaboltfund.co.uk](http://www.cumbriaboltfund.co.uk).

**Warning:** The quarry is now a popular venue and traffic has cleaned some of the lines, yet all of these Lakeland slate quarries are unstable with abundant loose material: Take care climbing, moving along the top and across the spoil heaps. The last major rockfall here was as recently as 2021.

## Approach

From the A593 Ambleside - Coniston road take the Tilberthwaite turn (acute right if approaching from the north) and park at a large car park below Tilberthwaite Quarry. Walk north along the road passing through the farm. Take the gated bridleway branching up to the left and follow this, steeply at first, for about 1km, until it levels out. To the west, high on the fell, a huge spoil-heap with a conspicuous slate incline marks the way into the quarry. To reach this continue along the bridleway and take the second track on the left; then over a stile to reach the inclined path which leads into the [Lower Quarry](#).

## Lower Quarry

TRAD/SPORT Uphill 30 min NORTH EAST facing 🧭🌂  
Lat/Lng: [54.412567615807475, -3.0686389844654513](#)

### Introduction

A sheltered spot where you may be out of any wind blowing through the [Middle Quarry](#).

### Approach

From the ruined buildings at the top of the incline, a loose path descends into the quarry.

Runestone 1 - Lower Quarry - Monster Dog area

### West Side

The right-hand side coming down the path from the ruined building. The routes are described clockwise...

**1** All I really want to do F6a+ New 12m

Climb the slab passing left of the overlap.

15.09.2020 D Geere, P Ibinson

**2** Betty Boo F6c+ New 13m

Gain the niche then take any finish on the slab...

20.09.2021 D Musgrove, P Clarke

**3** The Beatmasters F6b+ New 12m

Clip the first glue-in bolt then span left to good handholds above the lip and step left into the niche on *Betty Boo*. Mantel onto the slab and traverse left to the arête. Thin cracks in the left side of the slab lead to a short traverse back right.

20.09.2021 D Musgrove, P Clarke

**4 Ska Train F6a+ 12m**

Up and left onto the slab. From a ledge, step up and left and follow the thin slab.

27.08.1990 M Miller

Originally E3 5c with a skyhook runner - retobolted in 2020

**5 The Narrow Land F6a+ New 10m**

The hanging corner has suspect rock; reach the slab across a tricky bulge.

15.07.2020 K Phizacklea

**6 Unknown Warrior F7a+ New 10m**

Climb the flakes just right of the arête. Clip-stick the bolt on the left to protect the stiff pull to the slab.

2020 K Phizacklea

Re-ascended in 2022 with a Stiff Clip following the loss of a crucial hold: P Whillance

**7 Monster Dog F6c+ 10m**

The lower slab leads to a tough pull through to the top slab. Top out and belay on the ledge above.

25.08.1990 M Miller

Originally E4 6b - retobolted 2020

**8 Power of Sila F5b 10m**

Lovely climbing with one awkward move. Top out and belay on the ledge above.

29.05.2020 E Parker, H Mawson

### East Side

The first routes are down at the lowest point of the quarry on the left descending from the ruined building.

Runestone 2 Gandalf area

**9 Rosa Canina F6a New 12m**

The wall right of the corner. Start on a debris heap and go directly up to maillons on hangers.

15.04.2021 I Campion, G Campion

**10 Caspian F5b 15m**

A really enjoyable romp up the slab left of the descent. Move right across an undercut nose, then trend left to follow a shallow groove.

08.03.1992 B Pilgrim, M Edwards

**11 Ron's Ramble F5c New 15m**

Start as for [Caspian](#) and make a rising traverse rightwards, crossing the gully, to the lower off on [Runescape](#). Lower down as for [Runescape](#) to avoid the pit below the overhang.

7.06.2022 G Campion, G Edwards

**12 Runescape F6a New 12m**

From a ledge with a belay bolt step left onto a spike; step left onto the slab above the overhang. After a tricky move things settle.

Lower back down to the spike to avoid precarious blocks below the overhang.

5.05.2022 G Campion, I Campion

**13 Gandalf F6b+ 13m**

Continuously interesting climbing on the left arête of the square-cut pillar just left of [Gollum's Gully](#). Step up to good holds, then follow the left arête. Belay bolts lie over the top.

### Dolphin Buttress

This is the protruding buttress 10m left of [Lynn-er Motion](#) and opposite [All I really want to do](#).

**(18) Dolphin Direct** F5 † **New** 10m

Climb up crossing a dusty ledge and past a peg. Protection from the bolts and use lower off on right.

8.09.2023 | Campion, G Campion

**(19) Kipling Wall** F6c † **New** 10m

Easy climbing leads to a slab and steep wall above. Gain the wall by a thin diagonally slanting ramp and finish direct to the chain.

19.07.2023 | Campion, A Campion, G Campion

**(20) Arthur Dolphin isn't Dead, I've Seen Him in News of the World** F5a † 10m

The name is in poor taste; the climbing and the protection is no better! A leftward slanting line up buttress.

7.04.1991 T Peak, E Blylock

**25** **Yo! Pick Poe!** **HVS 5b** 10m

A large corner in the level below the extensive spoil slope.

07.04.1991 E Blylock, T Peak

**26** **Kobe's Cucumber** **F6b** **New**

From the top of a boulder reach small holds then bridge the groove with difficulty to gain ledges.

01.07.2021 G Campion, M Jackson

**27** **Evergreen** **F6c+** **New** 10m

Nice bridging in the slim corner.

30.07.2020 K Phizacklea,

(28) **Omicron** F6b New 10m

Climb the short corner and leftward slanting crackline on the left of the slab.

23.11.2021 G Campion, I Campion

(29) **Send it like Beccs** F6b † New 12m

The steep slab just right of **Omicron**. Climb directly using a few dubious flakes and brittle rock ! Should improve with traffic.

23.05.2022 G Campion, I Campion.

The next route starts below an undercut slab halfway up the spoil slope.

Runestone 4 - Fancy a Jump area

(30) **Fancy a Jump** F6c 10m

### The Gallery

Above the scree slope at the head of the [Lower Quarry](#) is a flat area, **The Gallery**. The left wall provides a dozen boulder problems between **V1** and **V3** which can be identified by the scars. The prominent arête is [Phantom Arête](#) **V3**, best approached by the path coming in from the right.

## Middle Quarry - East side TRAD/SPORT Uphill 30 min NORTH WEST facing Lat/Lng: [54.41160531190714, -3.0696138514715585](#)

### Introduction

The two faces of [Middle Quarry](#) offer contrasting styles:. **The West Face** gets sun in the afternoon and offers a fine varied spread of lines across the grades. Great for an afternoon or evening. **The East Face** sports some of the best routes here on a series of impressively steep walls enjoying morning sun. In the lower (northern) end of the quarry is the cave once used as an illicit whisky still by the notorious Lanty Slee. It was said that the resultant product was the best thing that ever came out of the quarry. **Warning**: there has been significant recent rockfall in [Middle Quarry](#).

### Approach

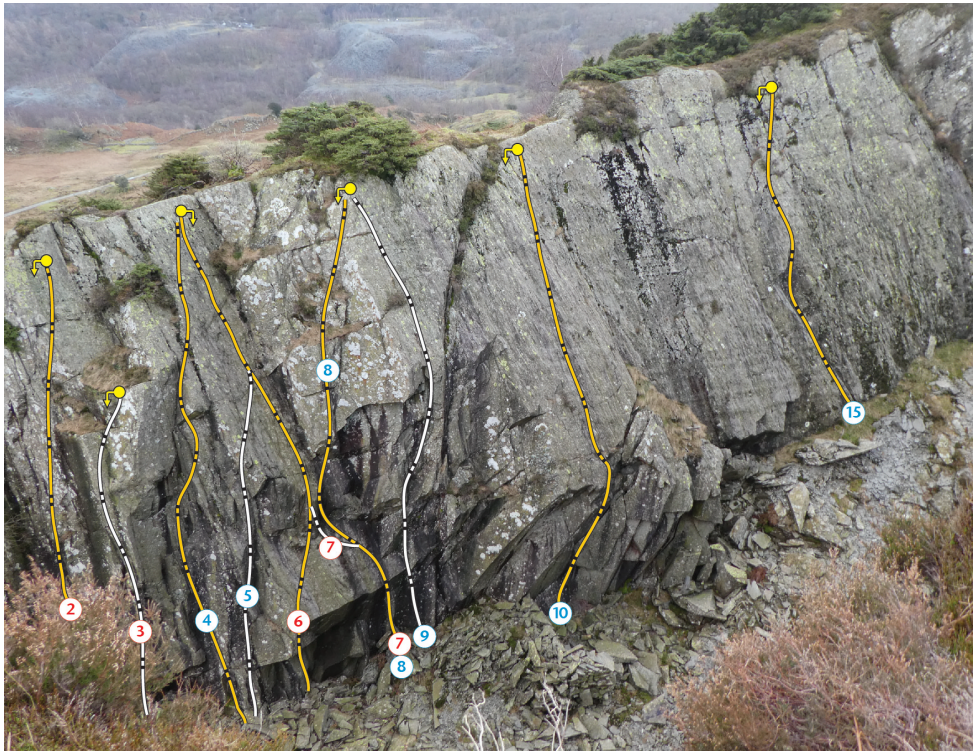

From the entrance to the [Lower Quarry](#), follow the path up the west side of the quarry to reach a flat area between the quarries, from here the [Middle Quarry](#) can be seen. [The Gallery](#) can be reached from this flat area. On the east side of the quarry is a path which leads under a huge impressive slab bridged across the entrance. [Belly Button Slab](#) is about 30m up to the left.

## Upper Quarry

Uphill 30 min

### Introduction

Immediately above and south of [Middle Quarry](#) and known locally as Tunnel Hole Quarry, quarrying here has only recently been discontinued (2021). Access is by abseil or via a hidden tunnel on its eastern flank. The most prominent feature is a huge arched cave at the southern (uphill) end.

In 2023 a new tenant acquired the tenancy for the quarry above, [High Fell Quarry](#), and restarted work there. This has led to liquid waste coming into the Upper Quarry and affecting some of the routes.

The East Face features a long bow-shaped wall of steep slanting grooves ending at a low cave. The climbs typically have difficult lower sections easing with height.

### Approach

Follow a path up to the right of [Middle Quarry](#) to reach a low wall and follow this then head left up to reach a grassy slope leading to the quarry top. Descend the steep eastern hillside with care, overlooking [Hodge Close](#), to reach some ruined buildings. The tunnel entrance is behind the buildings; initially wet with stepping-stones a drier section then emerges in a low cavern below the right side of the East Face. Abseil: from the anchor at the top of [Whiskey Galore](#). This is located on a slab alongside a grassy bay in a distinctive cut in the rim, The Notch, midway along the eastern side.

Mini-guide to Runestone Quarry  
Runestone 10 Upper Quarry East Face

### The East Face

The first route is on a short wall to the left of the East Face, starting from a prominent large square block leaning against the face.

#### 1 Changing of the Guard F6a New 8m ★

Step off the block traverse rightwards into a shallow groove and climb this on its right side pulling back left to a ledge.

12.05.2022 D. Geere, K. Phizacklea, P. Whillance

#### 2 Unrecalled Activists F6c+ New 12m ★

Start 5m lower down to the right of the prominent block, at a slabby groove in an alcove with a horizontal shot hole in left wall. Start easily for a few metres then climb a steep groove and over an overhang to gain a slab. Up this to the anchor.

12.05.2022 K. Phizacklea

The route is close to an old bolt line of unknown origin.

#### 3 Whiskey Galore F6b+ New 14m ★★

Start at an undercut slab below a line of overhangs at 4m. Move up to undercuts and pull over the overhang to gain a slab. Step up, then tiptoe right on a horizontal shot hole and pull around into a steep slim groove. Climb this over a small overlap and continue, exiting right onto a slab.

27.05.2022 P.Whillance, A. Towse

#### 4 Contraband F6c New 14m ★

Start as for *Whiskey Galore*. Move up to the undercuts then traverse awkwardly right beneath the overhangs to reach a good hold in a groove. Climb the slim slabby groove trending rightwards and pull over onto the slab.

16.06.2022 P.Whillance, A.Towse

#### 5 Casting the Runes F7a+ New 14m ★★

Start on the left-hand side of the wide cavern roof. From some blocks by a low shot hole make a stiff pull up to gain a smaller shot hole, then move right and up to an overlap. Pull straight over to a larger one, turn this on the left then climb a slab and short groove rightwards to the anchor.

12.05.2022 K. Phizacklea

#### 6 English Summer F7a+ New 16m ★★

From blocks below the left side of the roof boulder the roof to gain a groove and horizontal shot hole. Make awkward moves right to reach better holds (pre-clip the second bolt). Continue up and follow a slim groove, exiting right to a ledge. Move up and over an overhang then rightwards.

29.05.2022 K. Phizacklea

Runestone 11 Upper Quarry West Face

### The West Face

Right of the huge arched cave at the northern end of the quarry is a distinctive bottomless arête.

**7 White Lightning F7a New 18m**

Start below the right corner of a square pillar, just right of the cave. Climb the pillar to overhangs. Pull through rightwards then across a tricky white wall to reach the arête. Follow the thin crack line in the slab trending leftwards above a lot of space to reach the lower offs.

.....as in the old illegal hooch.

On the West Face right of a line of square cut overhangs is a big left slanting slab.

**8 Moonshine F6b+ New 22m**

This excellent route dries very quickly. Start at the base of the slab. Climb easily up to some ledges then step left and make delicate moves up a thin crack in the slab to reach better holds. Move up and pull leftwards around the arête into a short groove. Climb the middle of the slab to an anchor.
