Right-Hand Slabs area.

At the toe of this buttress and well down to the right from the existing routes like *Pleasant Slab* is another nice 15m narrow slab (**Slim Slab**) offering the next two routes. Descent – abseil from the tree 10m back or scramble down the right flank.

Slim Slab.

From the lowest point of the slab follow quartz plaques up leftwards then climb the centre of the slab to the top. Bold but escapable.

Climb the precarious right edge of the slab direct.

Right Wall.

Located higher up the right flank of **Hare Crag** above **Slim Slab**, this nice granite wall is visible in profile from the Wha House car park. Approach by scrambling across a boulder field and then head up through bracken, alternatively climb a **Slim Slab** route then scramble up past the abseil tree. The best descent is an awkward scramble down to the right.
